

Plant Capacity:	1.32 MGD
Foul Air Sources:	Influent works complex
Odor Treatment Technology:	Biotrickling filter followed by activated carbon polishing
Treatment Media:	PUF and activated carbon
Foul Air Flow Rate:	15,515 CFM
Design H <sub>2</sub> S Concentration:	20 ppm average
Design H <sub>2</sub> S Removal Performance:	99% at average inlet
Commissioned:	2015
